REPORT OF THE BOARD OF HEALTH

The town has been unusually free from contagious diseases the past year. Only four cases of measles and one of typhoid fever have been reported.

A very few cases of unsanitary conditions have required notice.

Analysis of samples of the town water by the State Laboratory have given uniformly excellent results.

Our freedom from contagious diseases has made the necessary expense of the Health Department much less than usual.

C. B. CHILDS, Health Officer.

WATER WORKS DEPARTMENT

Cogswell Spring Water Works.

The Board of Water Commissioners herewith submit their ninth annual report. The financial report is for the year ending January 31, 1923.

During 1922, three new service connections were made to the main pipe line. Very little new construction has been done. Several needed repairs were made at the different springs and reservoirs. In November the entire source of supply, which included all springs, wells and main reservoir was carefully inspected by an official of the State Board of Health. The sanitary condition of the system, which included all sources of supply and their surroundings from which water is collected was pronounced to be one of the best in the State.

The consumption of water increases each year thereby making it necessary to pump more water into the main reservoir. This to a great extent is caused through carelessness on the part of a great many water takers in not paying more attention to leaky faucets. In making an inspection of the entire system we are sorry to report that tremendous loss of water from this source was discovered. If patrons would be more careful and use extra precaution to eliminate this unnecessary waste, the yearly cost of pumping would be wonderfully reduced. December 27, 1922, a faucet sample was taken from the town system and sent to Charles D. Howard, State Chemist for analysis. The printed report received from this analysis stated that the sample "Represented water of excellent quality."

REPORT OF SUPERINTENDENT OF SCHOOLS

To the Henniker School Board:

I herewith submit my first annual report. It will not be for a full year for my term of service did not begin until August 1, 1922.

Nine elementary schools have been regularly in session, with a total enrollment of 206. The teachers with one exception have had previous experience. This is a great advantage. One I hope we shall be able to maintain. Permanency in the teaching force means more than any other one thing, for efficiency and real progress in the whole work of the schools.

THE AIMS OF EDUCATION

The general aim of education is to train all the children in those qualities of life and character, which shall make them good and efficient citizens in the community, state and nation.

The specific aims are, to develop in every child: (1) Amility to earn his living; (2) Willingness to contribute to the welfare of others; (3) Knowledge of how to use his liesure; (4) Knowledge of how to care for his health. All the efforts put forth by those concerned should be directed toward the attainment of these aims.

SCHOOL BUILDINGS

All the buildings are in good repair and are sufficient to meet the needs of the different sections. The toilet rooms at West Henniker should be rebuilt and made adequate to the demands of the school. This matter is one of sanitary and moral importance.

One session for the first and second grades at the central school is not a good idea as a matter of permanent policy. It can readily be shown that two short sessions for beginners are preferable to one long. Therefore I recommend that we make plans, putting in more seats if necessary, to have the regular sessions for the first and second grades.

DOMESTIC ARTS AND MANUAL TRAINING

Work in these departments has been very successful for the 7th and 8th grades. Larger appropriations for this practical arts work would provide for expansion and development that would mean a great deal for many of our young people. A visit to the school would convince every citizen of Henniker that the canning, cooking, sewing and shop work are all of great value to the children.

THE HIGH SCHOOL

The necessity for a high school education is now generally recognized by all classes. The question then in the minds of all thinking people is "What sort of an education shall it be?" The answer is "One that will meet the needs of the community in which the school is located." The Henniker high school, though it is doing very good work, is not meeting those needs as it should. I therefore recommend that a careful study of the situation be made under the direction of the school board and that the course of study be enlarged and liberalized so that the needs of the young people can be met more efficiently. In enlarging the course of study, it would be highly desirable to have an additional man on the teaching force.

The enrollment this year is 45. Too large a number have already dropped out. This unfortunate state of affairs is not wholly the fault of the scholar or the course of study. Here as elsewhere children are too willing to drop down and give up when the task becomes hard.

In closing, I wish to express my appreciation of the kindly spirit of cooperation manifested by teachers and members of the school board and also by the community. All this cordial goodwill makes the work much more worth while.

Respectfully,

GAIUS H. BARRETT, Supt.
